SUMMARY

I'm a full stack developer currently learning how to code native Android apps after working in web development making sites with Drupal, Wordpress, ExpressionEngine, and Magento. I've also built mobile and web applications with RESTful APIs, NodeJS, AngularJS, Ionic, and PhoneGap.

EXPERIENCE

Web Developer, Freelance

Portland, OR — 9/2011-present

Manage website and mobile application development through all stages including creating proposals and cost estimates, market research, project scoping, and contract negotiations. Design, layout, frontend and backend coding of client websites with a focus on usability and best practices.

Web Developer, TNG

Portland, OR — 9/2015-5/2017

- Developed a set of custom Drupal modules that when enabled together create a complete solar power sign up web application: allowing users to calculate how much money they'd save each season by switching to solar power and sign up to make the switch or be placed on a wait list. Also allowed admins to export user solar sign ups as an Excel spreadsheet.
- Developed a translation management Wordpress plugin which connected the qtranslate-X localization plugin to the Memsources Cloud Translation service via an API.
- Custom responsive theme development for Wordpress and Drupal using the Advanced Custom Fields plugin for WP and a workflow that included Grunt/Gulp, NPM, Composer, and Bower.
- Client site migrations to Wordpress and Drupal using custom content/post type creation, Views building, module and

EDUCATION

Northeastern University Boston, MA

— B.S. Health Science, 2008

theme settings management using Features, and importing of old site users and content.

Web Developer, Outlier Solutions

Portland, OR — 9/2013-5/2015

Responsible for participating in the full life cycle of new website and web application development projects, and for designing, implementing, and maintaining best practice procedures in all areas of work.

Responsibilities

- Custom Drupal module development including a “Get a Quote” module for a Drupal 6 ecommerce site and an extension of the Domain contrib module which allowed visitors to a large Drupal 7 ecommerce site to select a region and receive prices specific to their location.
- Built an Android and IOS mobile app for a large ecommerce site with a headless Drupal backend using AngularJS + Ionic framework and a REST API.
- Converting static HTML and CSS into Drupal 8 Twig template files. Also included creating template preprocessing functions, Blocks, custom content types, and Views.
- Content strategy, user demographics, persona building, and traffic analysis using Google Analytics, Quantcast, Facebook OpenGraph and Domain Insights, and Alexa

Technical Account Manager, Upsource LLC

Portland, OR — 9/2012-1/2013

Worked as part of a multi-disciplinary marketing team, carrying out ad-hoc tasks as requested by the CTO.

Responsibilities

- Keyword research and marketing strategy development.
- Local search listing management
- Citation building and auditing.
- Tracked and analyzed marketing campaign efficiency using: Google Analytics, SEOMoz, Raventools, BrightLocal, and in-house reporting system.

Interim Operations Manager, AutoBidMaster LLC

Portland, OR — 3/2012-9/2012

Customer Service Representative, Vibram USA

Concord, MA — 9/2009-12/2011

Department Supervisor, Kohl's Department Store

Medford, MA — 9/2006-2/2009
